Full Job Description

Omega Fertility Center is a fertility clinic that provides insight, hope and care for individuals who have concerns about their fertility and overall reproductive health. We are currently looking for a full-time Registered Nurse. The Fertility Nurse works collaboratively within the Clinical Operations Department and with the total Practice to provide timely, proficient services for all patients. The Registered Practical Nurse is the primary contact and accountable for how a patient's cycle progresses.

- Counsels, educate, and coordinate patient care with the patient/couple throughout the fertility journey.
- Manages patients in all phases of treatments including pre-screening, treatment, and post treatment.
- Provides patient/couple procedure education, and scheduling of treatment/coordination of treatment cycles after initial and follow up visits.

- Coordinates patient treatment plans in conjunction with established clinical protocols.
- Directs and monitors cycling visits including: medication instruction (schedule, dosage and administration), anticipatory guidance, and clarification of physician instructions
- Communicates physician orders and instructions.
- Communicates laboratory results with appropriate interpretation and explanation.
- Coordinates scheduling of cycles and procedures with patient and appropriate staff
- Schedules and performs IUI procedures as needed
- Assures quality care by adhering to therapeutic standards; follows physician practice and nursing division philosophies, as well as standards of care set by the provincial and other governing agency regulations.
- Performs routine patient assessment as needed (height, weight, vital signs, phlebotomy, etc.).
- Assists physicians with procedures, exams as needed.
- Documents patient care in EMR
- Maintains safe and clean working environment by complying with procedures, rules, and regulations, and calling for assistance from other health care support personnel when appropriate.
- Protects patients and employees by adhering to infection-control policies and protocols, medication storage procedures, and controlled substance regulations.
- Ensures operation of equipment by following manufacturer's instructions. Reports problems or malfunctions to appropriate staff member.
- IV insertion, phlebotomy as necessary
- Accepts resource assignment; assists all staff with information of area assigned.
- Attends meetings as assigned; communicates issues where appropriate.
- Cooperates, interfaces and works independently to assure the program goals are achieved.
- Maintains patient confidence and protects operations by keeping all patient information confidential. Skills/Requirements
- Current Certificate of Registration, College of Nurses of Ontario with Minimum of 3 years experience as a Registered Nurse
- Current BCLS and ACLS
- Previous experience in reproductive medicine and or gynecology preferred (or Women's Health)
- Demonstrates critical thinking, problem solving and decision making
- Excellent computer skills, comfortable with working with an EMR
- Ability to work as part of a multi disciplinary team.
- Ability to communicate accurately and concisely.
- Ability to work independently to manage a caseload of patients.
- Commitment to patient centered care
- Demonstration of good attendance and work performance
- Understands the importance of and maintains privacy & confidentiality
- Comfortable working with the LGBTQI2 community
- Demonstrated ability to respond to emergency situation
